

Vrinda Store Sales Dashboard

Data Analytics Project using Advanced Excel

Advanced Excel | Pivot Tables | Data Visualization

Project Overview:

Analyzed Vrinda Store sales data using Advanced Excel to identify customer purchasing behavior, sales trends, and business growth opportunities.

Performed data cleaning, preprocessing, data analysis, and built an interactive dashboard for effective visualization and decision-making.

Dashboard Preview :

Key Insights :

- Highest sales were recorded in March
- Women customers contributed around 65% of total sales
- Adult age group (30–49 years) contributed the maximum orders
- Maharashtra, Karnataka, and Uttar Pradesh were the top-performing states Amazon, Flipkart, and Myntra generated the highest sales contribution.
- Majority of orders were successfully delivered

Tools & Skills Used

- Advanced Excel
- Pivot Tables & Pivot Charts
- Data Cleaning
- Data Preprocessing
- Data Visualization
- Interactive Dashboard Design

Conclusion:

The analysis suggests that Vrinda Store can improve sales by targeting **women customers** aged 30–49 years from **Maharashtra, Karnataka, and Uttar Pradesh** through attractive ads, offers, and coupons on platforms like Amazon, Flipkart, and Myntra.

This project helped in understanding customer behavior, sales trends, and how data-driven decisions support business growth.
